

Metadata-Driven Automation for Faster, Smarter Duck Creek Data Migration

Migrate Faster. Reduce Risk. Protect Business Continuity.

Flyer

Core System Modernization Shouldn't Mean Business Disruption

Migrating to the Duck Creek platform is a smart investment in agility and future-readiness—but the path to get there can be filled with obstacles: legacy data inconsistencies, long blackout periods, and compliance challenges that delay timelines and inflate costs.

At Hexaware, we've reimagined Duck Creek migration. Our metadata-driven automation engine is designed to accelerate data migration from legacy systems, reduce manual work, speed time-to-value, and ensure your transformation stays on track—without putting daily operations at risk.

We don't just move your data; we transform it into a clean, compliant, Duck Creek-ready asset that works from day one.

We Eliminate the Roadblocks That Slow You Down

- **Inconsistent Legacy Data**
Duplicates, missing contact info, mismatched claim histories
- **System Gaps & Mismatches**
Out-of-sequence endorsements or mid-term changes impacting downstream modules
- **Payout & Premium Errors**
Caused by misaligned rating factors and manual re-entry
- **Audit & Compliance Risks**
Lack of traceability between legacy system migration sources and Duck Creek and Duck Creek
- **Extended Downtime**
Manual loads and failed data transfers lead to long blackout periods

Our Proven Migration Blueprint

- **Data Profiling & Cleansing:** Quickly identify and resolve data quality issues using pre-configured business rules
- **Smart Mapping & Reconciliation:** Ensure consistency across Policy migration, Claims migration, Billing, and Party modules with intelligent alignment.
- **Automation-Driven Execution:** Minimize manual touchpoints—load data faster, more accurately, and at scale
- **Flexible Migration Modes:** Support for both on-renewal and big-bang approaches, including mid-term migrations
- **Audit-Ready Validation:** Built-in financial matching and regulatory traceability from day one

Technology Built for Duck Creek Success

Our migration platform integrates seamlessly with Duck Creek's .NET middleware and migration rules, enabling:

- Automated transformation of legacy transactions into Duck Creek-ready formats
- XML generation for policy data loading
- Premium consistency across Policy, Billing, and IDO
- Real-time error detection and remediation

No guesswork. No rework. Just migration done right.

Why Hexaware?

20+ Years in Insurance	Duck Creek & Guidewire Experts	Accelerators that De-Risk Complexity	Cloud-Ready, API- First Architecture
Proven understanding of complex policy structures and claims processing	Deep expertise in core platform integrations and configurations	Pre-built assets to handle legacy system migration challenges and ensure compliance	Scalable design ready for your future-state ecosystem

Modernization Without Compromise

Let's migrate your core with confidence, precision, and zero downtime—and set you up for the next decade of growth.
