HEXAWARE

Overview

Hexaware is a global IT consulting provider with strong focus on cloud-based solutions. The company has its headquarters in Mumbai, India, and has more than 20,000 professionals serving 260 customers from 36 global offices. The company generates more than $900 million revenue. Hexaware is an AWS Premier Consulting Partner with more than 4,000 cloud experts and more than 80 customers.

Strengths

Holistic AWS cloud journey-mapping: Hexaware's AWS consulting services provide clients a holistic cloud journey map, considering the critical strategic dimensions of cloud transformation, innovation and cloud adoption. Its intellectual property-driven Amaze offerings provide re-platforming and modernization roadmaps for a broad range of enterprise applications running in diverse environments. As an advanced consulting partner in the AWS partner network, Hexaware has demonstrated capabilities to stitch and deliver strategic cloud value propositions in a diverse range of client segments.

Partner capabilities: Mobiquity, a Hexaware company, has brought a specialized set of tools and frameworks to the AWS consulting services ecosystem of offerings. Its assets enable clients to re-envision the journeys of their digital businesses powered by several technical AWS cloud competencies. Hexaware focuses on strengthening its partner capability ecosystems for AWS and hybrid cloud adoption capabilities from front-end to back-end, in complex client scenarios, for example, as manifested in its recent joining of forces with cloud-native leader Lightbend.

Caution

Hexaware has significant opportunities for expanding its AWS certified competencies and in communicating effectively about its already proven and differentiated competencies, especially in the U.S. and other crowded, mature markets.

2021 ISG Provider Lens™ Leader

Hexaware's AWS consulting services excel at providing holistic strategic cloud journey maps across its business transformation initiatives through cloud innovations and adoption.
