Challenge

Solution

Benefits

The client, one of the Bitcoin friendly banks, aims to bring financial stability to billions of consumers in countries where banks don't easily earn a high level of trust. Their ambition is to deliver the best of both worlds to their consumers by merging the stability of traditional banking with a seamless and secure portal for Bitcoin transactions.

In just a few years, Bitcoin has already become a trusted crypto currency, reaching a market value of \$10 billion.

The bank has partnered with Hexaware, a full-service digital transformation enabler, to overcome technical challenges and ensure they become a globally accessible bank by supporting its digital innovation and global expansion with reliable IT architecture.

In order to achieve this, a Hexaware team of top engineers supported the client with Microsoft Azure cloud integration within their AWS stack, offering a well architected and developed multi-cloud solution, based on Confidential Computing Intel SGX Processors.

The innovation and digital banking can only be built on a foundation of solid IT that brings to life the bank's business mission and vision. To this end, supporting a cloud native mobile banking application built on top of a modern architecture has enabled reliability, security and agility of our client's IT architecture.

About Hexaware

Hexaware is a global technology and business process services company. Our 27,000 Hexawarians wake up every day with a singular purpose; to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With 40+ offices in 19 countries, we empower enterprises worldwide to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
