

Manufacturing & Consumer

Empower Your Business with Hexaware's Tailored Operational Intelligence Solution for Manufacturing

Are unplanned stoppages draining your budget? Struggling to turn investments in plant and connected assets into value? As competition shifts to data-driven Industry 4.0 factories, a robust solution is essential.

Hexaware's operational intelligence solution is your fast track to harnessing Industry 4.0. By unifying plant-floor and enterprise data, you gain real-time insights, predict failures, and implement quick fixes.

With predictive models, automated decision-making, and self-improving AI, Hexaware helps you boost uptime, reduce costs, and unlock hidden capacity for growth. Elevate your operations into a smart, data-driven powerhouse with Hexaware.

Operational Intelligence Journey: Start, Scale, or Optimize with Hexaware

Hexaware's operational intelligence solution supports you at any stage—whether you're starting, scaling, or optimizing. Our phased approach guarantees measurable results throughout your journey.

Reactive, Standardized Operations

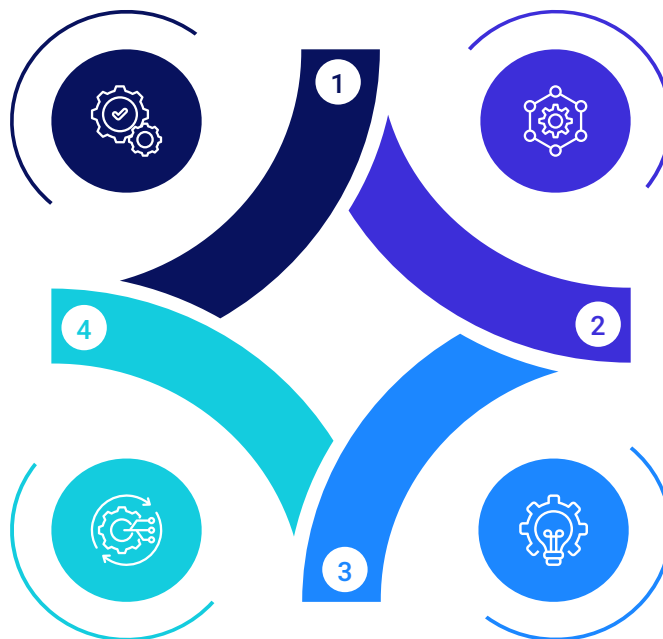

Chronic downtime and quality issues hinder goals.

Standardizing tasks and capturing production data reduces errors, enhances compliance, and reveals cycle time insights.

Future-Ready Operations

Plants struggle to achieve competitive margins and minimize downtime.

AI monitoring enables self-optimizing operations to enhance stakeholder value.

Unified Operations

Operational silos slow down efficiency.

Integrating connected assets for real-time visibility boosts throughput, productivity, and quality.

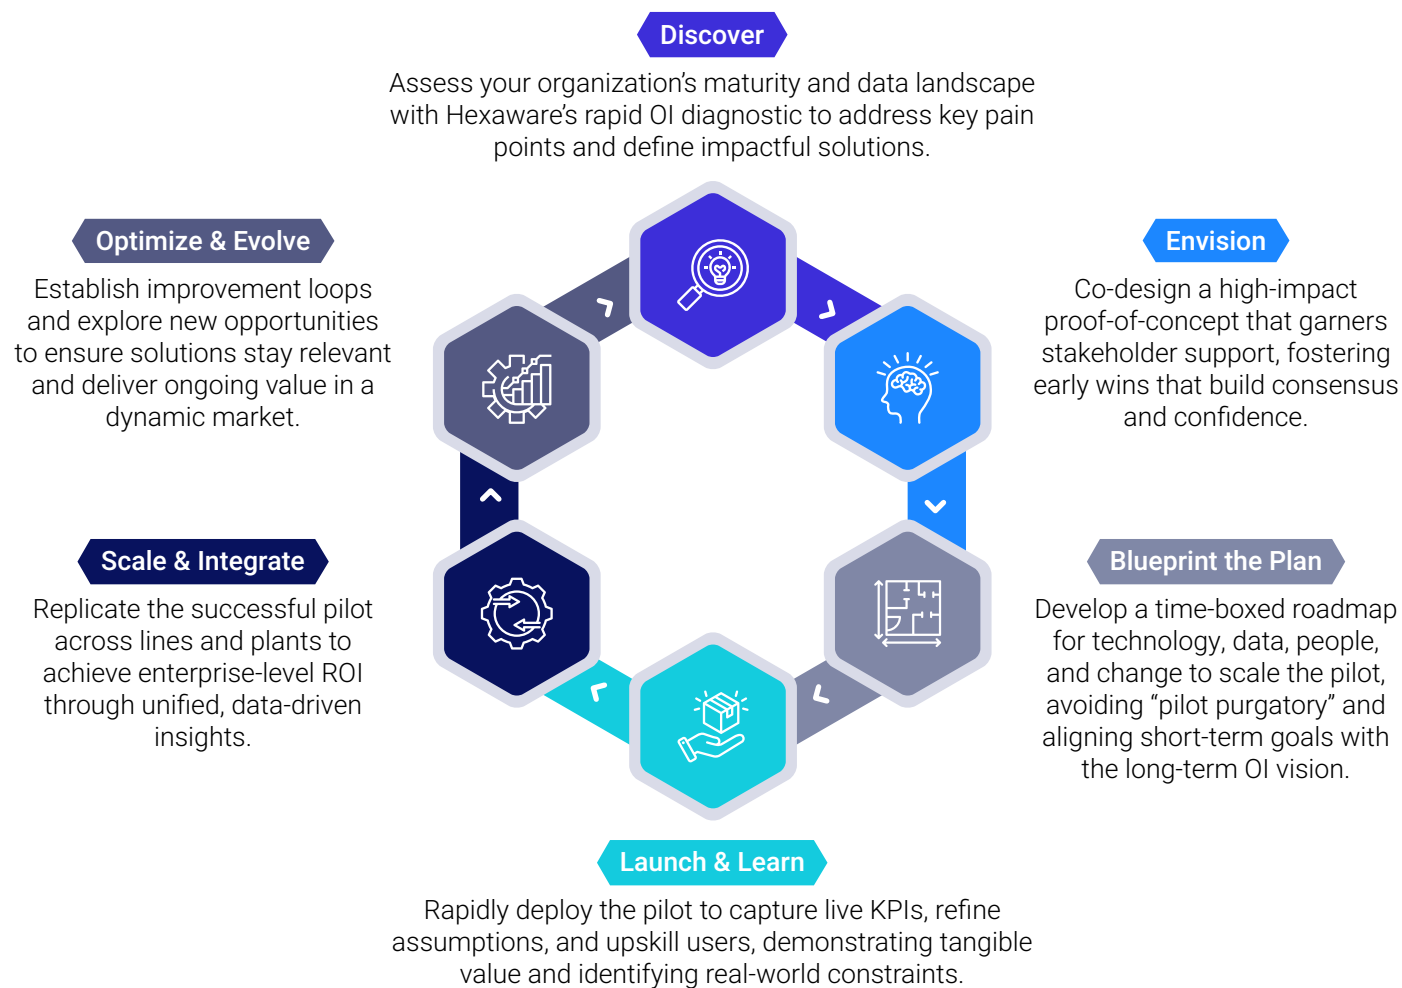

Intelligent Operations

Missed On-Time In-Full goals affect efficiency.

Leveraging AI/ML and digital twin technology helps optimize operations and improve asset effectiveness.

Build Tomorrow's Operations—Hexaware's Playbook

At Hexaware, we employ an iterative strategy to boost operational intelligence for our customers, ensuring continuous improvement. Here's our playbook for the customer journey:

Success Story

A mining and manufacturing organization invested significantly in IoT, but their data remained trapped in disconnected systems, leading to escalating operating costs. By unifying their data into a single data lake and implementing machine-learning models, we predicted idle-time losses and engine failures. This transformation led to an 8% increase in asset availability, \$12 million in cost savings, and a 50% reduction in total cost of ownership as models scaled across sites.

Let's navigate your journey together—reach out to [Hexaware](https://www.hexaware.com) today and discover how we can transform your business!

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With offices across the world, we empower enterprises to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
