Build a Future-Ready Workforce with Hexaware's AI-Powered Industrial Training Solutions

Ready to transform your workforce training in the competitive manufacturing landscape? Hexaware's AI-powered employee training platform streamlines immersive training through advanced training environments catering to web, tablets and VR headsets, allowing workers to master complex tasks with minimal production disruptions.

Our solutions address key challenges like high attrition rates, lengthy onboarding, and the need for cross-skilling while overcoming the limitations of traditional methods and immersive training issues. Its low-code/no-code approach enables organizations to create and rapidly deploy training contents across various channels (web, tablet & VR) efficiently.

Hexaware's AI-Powered Industrial Training Solutions: For Fast-Track Workforce Development

Driving Results

Are you ready to elevate your industrial training strategy and build a future-ready workforce? With our manufacturing workforce training solutions, the possibilities are endless!

Integrated Modules for Comprehensive Training

Hexaware's solutions consist of four powerful modules, each designed to solve specific training challenges:

Hexaware's mergence studio

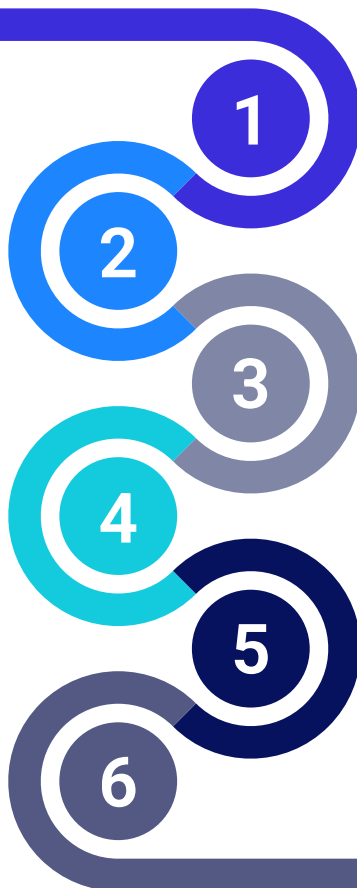

A low-code/no-code authoring tool enabling subject matter experts to quickly create immersive training contents and modules with detailed scenarios and real-time analytics targeting web, tablet & VR devices.

Hexaware's mergence web

A web and tablet-based training contents that provide high experience training needs for the workforce without the need for any additional gadgets.

Factory model for contents

High velocity, low-cost driven factory model for high quality digital twin and 3D / 2D assets creation pipeline that drive web and immersive training needs.

Hexaware's mergence prep

Converts CAD and 3D models into training-ready content via a semi-automated pipeline, ensuring consistency and scalability through a centralized repository.

Hexaware's mergence XR

A cross-platform solution enabling workforce training experience on VR & tablets, built from process-driven configurations authored through Hexaware's mergence studio.

3D Asset repository

An enterprise-grade repository that streamlines asset management and boosts productivity for managing training contents.

Why Choose Hexaware's Industrial Training Solutions?

By integrating these modules, our AI-powered workforce training solutions eliminate inefficiencies in traditional and immersive training methods. They accelerate creation of industrial training content, provide consistent training quality with best practices, reduce employee onboarding costs, enhance safety & quality compliances, fast track onboarding of new products & facilities, and empower organizations to build a future-ready workforce. With our solutions, we're redefining manufacturing workforce training, enabling you to thrive in the era of digital transformation.

Ready to redefine your industrial training strategy with AI-powered solutions? Discover the power of Hexaware's workforce training solutions today and empower your workforce for the future!
