

Vibe Coding with Hexaware

Outpace Traditional SLDC. Build Smarter with AI-Native Development

Flyer

In a hyper-competitive world, code alone isn't enough—velocity, intelligence, and adaptability are your edge.

Vibe Coding empowers enterprises to deliver software at the speed of strategy. Our AI-native squads fuse human expertise with autonomous AI agents to build, test, and deploy production-grade solutions in weeks.

Backed by our Intelligent Development Lifecycle, Hexaware's transformative Vibe Coding capabilities span modern product engineering, legacy transformation, AI orchestration, and digital workforce design—delivering scalable outcomes, faster.

Executive Challenges We Solve

• Sluggish SDLCs

Traditional delivery models can't match AI-native speed.

• Talent Bottlenecks & Rising Costs

Limited developer bandwidth slows innovation.

• Legacy System Burden

Expensive to maintain, harder to evolve.

• Risky Lift-and-Shift Migrations

Disruptive and ineffective for long-term agility.

Our Solution Offerings

Minimum Viable Deployment (MVD)

Launch a functional AI-native prototype in just 2–4 weeks.

- Includes frontend, backend, testing, and security AI agents
- Supported by a technical lead, product owner, and QA specialists
- Covers user feedback integration, performance validation, and security compliance

Enterprise-Wide Readiness Assessment

Assess your organization's readiness for AI-native development in 2–4 weeks.

- Includes AI agents for assessment, data analysis, and compliance review
- Supported by an enterprise architect
- Delivers a detailed readiness report with risk mitigation plans and ROI projections

Production-Ready Build

Transform your MVP into a full-scale, production-ready solution in 4–12 weeks.

- Includes domain-specific AI agents for application development and testing
- Delivered by senior engineers, a solution architect, and integration specialists
- Comes with complete testing, documentation, training, and deployment

Squad Formation

Build sustainable hybrid squads combining AI agents and human experts.

- Includes AI development, DevOps, and orchestration agents
- Guided by senior developers and delivery leaders
- Covers environment setup, team training, workflows, and collaboration protocols

The Outcome

KPI	Impact
Delivery Speed	10X Faster
Cost	3X Reduction
Quality	50% Fewer Defects
MVD	Delivered in 2–4 Weeks
Production	Ready in Under 12 Weeks

Vibe Coding Use Cases

Creative Exploration & MVPs

- Brainstorm UI/logic via natural prompts
- Prototype business ideas with minimal effort
- Build full-stack MVPs (APIs + frontends)
- Run EDA, generate reports, automate data cleaning

Automation & Engineering Efficiency

- Eliminate repetitive coding tasks
- Auto-generate unit & test cases
- Create CI/CD pipeline blueprints
- Learn/debug with real-time AI support

MVD Delivery in Action

- Scaffold APIs and frontends rapidly
- Build custom AI agents
- Test new tech stacks with code spikes
- Prototype infra & pipelines (e.g., Terraform)
- Fast fixes via war-room-stylcollaboration

Vibe Coding isn't just faster—it's smarter, leaner, and built for the AI-native enterprise. Partner with Hexaware to accelerate your development, modernize with confidence, and lead with intelligence.

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose; to create smiles through great people and technology. With offices across the world, we empower enterprises worldwide to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
