

Cloud Cost Optimization with App Modernization

Flyer

Use the Cloud Better with Modernized Applications

Enterprises lack a formal process for refining cloud costs for apps and their components. The question is—Why let the cost of inaction grow?

Hexaware's cloud cost optimization solution for application modernization takes a proactive and practical approach to optimizing cloud costs for applications, its tech stacks, and databases with a continuous improvement framework that boosts the productivity of underutilized resources.

Realize Better Possibilities with Your Applications

Modernize Your Applications with a Focus on Cloud Cost Optimization

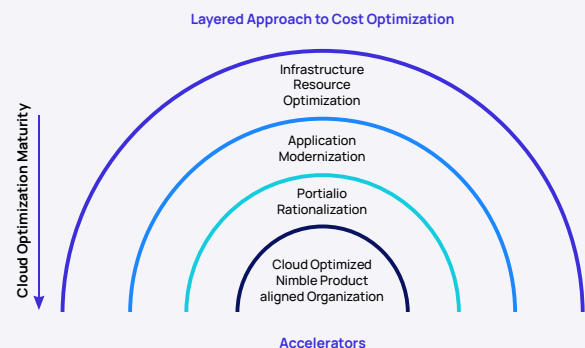

Get assessment of your applications and cloud landscape and systematically drive improvements with our multi-layered and phased approach.

The process starts with a comprehensive code performance analysis to identify over-provisioned, redundant, and outdated technology resources. This enables you to maximise cost improvement opportunities effectively.

Our Phased Approach

Unleash the underlying potential of your applications, services, and assets while optimizing costs and invest in new opportunities, like AI exploration.

- **First: Drive Continuous Infrastructure Resource Optimization:** Improve resource usage, consolidate workloads, and reduce waste.
- **Second: Plan and Execute Application Modernization:** Upgrade legacy systems or modernize to cloud native solutions for scalability, security, and efficiency. Optimize for license cost reduction or removal.
- **Third: Aim for Portfolio Rationalization:** Remove redundancy, simplify systems, align with business goals and cut expenses.
- **Fourth: Create a Cost Optimized Product Aligned Enterprise:** Align teams to products, consolidate capability, improve agility, and reduce costs.

Benefits of Our Phased Approach

Phase 1: Identify Cost Optimization Opportunities

Receive a comprehensive analysis of cost reduction and optimization opportunities for your infrastructure and apps. Our workshops with your SMEs let you build release plans and assess configuration management databases.

Phase 2: Define a Target State for Cost Benefits

We define a clear vision for the desired end state of apps. Reduce redundancy, optimize costs, and eliminate unutilized resources. Map progress with Recovery Point Objectives (RPO) and Recovery Time Objectives (RTO).

Phase 3: Plan and Optimize Cloud environment for Your Applications

We identify and group similar optimization opportunities across your applications, ensuring each wave includes logically grouped apps and their supporting IT infrastructure.

Phase 4: Verify and validate with AI for Optimization

We validate that your apps work as intended by testing against defined cases and metrics, documenting issues, and tracking fixes until the apps deliver their promised value.

Experience The Amaze® Difference for App Modernization

A framework to transforms your apps into modernized, sustainable powerhouses.

GenAI for Opportunity Discovery

GenAI features of Amaze® support assessments to identify business opportunities.

AI Agents for Code Modernization

Amaze® agentic AI manages code conversion and optimization for large codebases.

AI Automated Cloud Transition

AI features of Amaze® automate the cloud transition for optimal resource usage.

Amaze® Integration with Hyperscaler native tools and frameworks

Microsoft Azure

GitHub Copilot: AI-powered code suggestions

Azure Advisor: Cloud resource optimization tool

AWS

Amazon Q: GenAI development assistant

AWS Trusted Advisor: Best practices recommendations

Google Cloud

Gemini Code Assist: Assisted coding agents

Google Active Assist: Proactive cloud management support

Optimize Your Cloud for Leaner, Smarter Apps

Ready to ensure your apps deliver value at the lowest possible cost? Let's start the conversation. Experience excellence in your cloud and AI transformation with Hexaware. For more information, reach out to marketing@hexaware.com

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With offices across the world, we empower enterprises to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
