

AI-Powered Sustainable Cloud Applications

Flyer

Assuring Your Enterprise Apps Are Future-Ready

As AI begins delivering value within business and consumer apps, it's the right time to check if your apps are geared up for what's next. Our solution prioritizes innovation, application maintainability, supportability, security, and cost optimization balanced with the performance your business needs.

Key challenges you can address:

- **Legacy architectures:** Application designed decade back cannot meet business scaling demands of today's market.
- **Code Quality Issues:** Unoptimized and non-modularized code impairs performance, leading to slower response times.
- **Outdated Tech Stacks:** Using end-of-life (EOL) systems and libraries increases security risks and operational instability.
- **Growing Technical Debt:** Years of accumulated debt complicate maintenance and prolong project timelines.
- **High Costs:** Dependence on expensive commercial databases and middleware limits financial resources for innovation.

Unleash application's true potential with modern AI-first design principles, resulting in reduced operational cost. These savings assure sustainability for your apps and allows reinvesting the savings for innovation.

Optimized Apps Delivering Measurable Value

Our App Sustainability Solution Offerings

1. 5-Step App Modernization Framework

Get guidance for upgrades that boost your applications' longevity and performance.

2. Partner Funded and CAF Roadmaps

Benefit from the latest offers and best practices by AWS, Microsoft, and Google in cloud adoption.

3. GenAI Assisted App Assessments

Assess your applications and data estate using GenAI, mapping dependencies faster.

4. AI-Automated Code Refactoring

Modernize your codebase using intelligent automation, assuring maintainability and adaptability.

5. AI Feature Integration for Applications

Tap into AI features for business users and consumers to scale innovation with your applications.

Hexaware's 5-Step Modernization Framework for Sustainable Apps

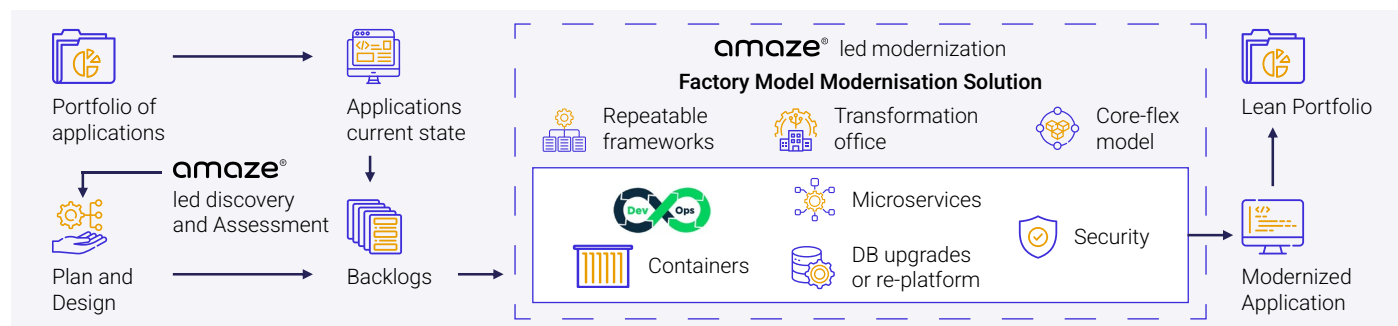

Experience App Modernization

Our Amaze® platform-powered app modernization framework transforms your apps into modernized, sustainable powerhouses while offering total cost optimization for your business offerings.

- The platform assists in the discovery and assessment of your application portfolio to drive evaluation and help create a detailed plan and design.
- It supports repeatable frameworks, a core-flex model, and a transformation office, it helps integrate microservices, containers, and DevOps best practices.
- It addresses security enhancements and database upgrades or re-platforming.

The result is a lean portfolio of modernized applications, ensuring agility, scalability, and optimized performance.

Solidify Your Apps Now to Prepare for Tomorrow

Ready to build rock-steady apps for the AI waves yet to come? Let's start the conversation. Experience excellence in your cloud and AI transformation with Hexaware. For more information, reach out to marketing@hexaware.com

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With offices across the world, we empower enterprises worldwide to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
