

Digital and Software

Reimagine the Developer Experience with GitHub Copilot

Flyer

Build Faster. Code Smarter. Innovate More.

Modern developers face mounting complexity—new languages, frameworks, and platforms—while spending less than one-third of their time writing actual code. Inefficient processes don't just slow delivery; they drive burnout and attrition.

It's time to rethink developer experience (DevEx).

Turn AI into a Developer Advantage

Empower your teams with AI-assisted development tools that streamline every stage of the software development lifecycle (SDLC)—from planning and coding to testing and deployment.

By combining GitHub, Visual Studio, and Microsoft Azure into a secure, unified toolchain, developers can focus on innovation instead of remediation.

Why GitHub Copilot Changes Everything

GitHub Copilot, the world's most widely adopted AI developer tool, transforms how developers build software:

- 55% faster task completion
- 60% report higher job fulfillment
- 87% spend less mental effort on repetitive work

Trusted by:

- 50,000+ businesses
- 1 in 3 Fortune 500 companies
- 1.8M+ developers worldwide

Focus on What Matters Most

More time on

- Designing solutions
- Brainstorming ideas
- Collaborating across teams
- Iterating and planning

Less time on

- Boilerplate and repetitive code
- Debugging and syntax fixes
- Searching documentation
- Learning complex GitHub commands
- Deciphering legacy code
- Finding vulnerabilities

Developers with faster code turnaround report 20% higher innovation and 50% less technical debt.

How Hexaware Can Help

- Assess your current SDLC to identify friction points, productivity leaks, and automation opportunities
- Enable enterprise-ready GitHub Copilot adoption with secure setup, governance, and best practices
- Embed AI-assisted development across coding, testing, debugging, and documentation workflows
- Standardize development workflows to reduce cognitive load and improve code consistency
- Accelerate onboarding by helping developers ramp up faster with AI-powered guidance
- Ensure security, compliance, and responsible AI usage across the development lifecycle
- Measure DevEx impact with clear metrics on productivity, cycle time, and developer satisfaction

Let your developers build what's next—faster, smarter, and with confidence.

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With offices across the world, we empower enterprises to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
