

Unified Data. Trusted Intelligence.
Operationalized

Amaze® for Data & AI for Healthcare Payers

Flyer

Healthcare payers operate across deeply fragmented data estates. Common challenges include:

- Claims data scattered across legacy warehouses
- Poor data quality blocking HEDIS and STAR reporting
- Delayed data pipelines limiting timely member insights
- Manual governance overwhelming compliance teams
- Disconnected provider, eligibility, and pharmacy data

The result: slower decisions, higher regulatory exposure, and unrealized AI potential.

Amaze® for Data & AI helps healthcare payers turn fragmented, low-trust data into a unified, AI-ready intelligence foundation. It enables faster decisions, audit-ready compliance, and reliable AI outcomes without long transformation cycles or manual effort.

The Difference: Agentic Data Engineering

This is not generic ETL. It's not basic cloud migration.

Agentic data engineering combines autonomous AI-ready data pipeline generation, continuous learning, and intelligent orchestration to modernize payer data at speed and scale.

What sets Amaze® apart:

- **Payer-Built Foundation** – Pre-engineered for claims, HEDIS, eligibility, and pharmacy benefits

- **Agentic AI Healthcare Automation** – Data pipelines deployed in 48 hours, not 6 months
- **Accuracy by Design** – Up to 95% improvement by eliminating manual data wrangling with GenAI

Built for Healthcare Payers

Amaze® for Data & AI is optimized specifically for payer operations:

- **Rapid Legacy-to-Cloud Modernization**
Unifies claims, eligibility, and provider data with automated governance
- **AI-Powered Pipelines**
Accelerates HEDIS, risk adjustment, and revenue workflows in minutes
- **Industry Proven**
Co-engineered as the industry's first payer-focused data sciences cloud

The Solution

Amaze® for Data & AI transforms legacy data chaos into a cloud-native, trusted intelligence foundation.

It automates:

- **Platform Modernization**
Legacy systems to scalable cloud platforms

- **Trusted Data Foundation**
AI-driven profiling, lineage, and quality scoring
- **Intelligent Data Pipelines**
GenAI-accelerated HEDIS, claims, and analytics
- **Healthcare Compliance Automation**
Built-in quality gates, audit trails, and governance

The Payer Payoff

With Amaze® for Data & AI, payers can:

- Build HEDIS pipelines in minutes—not months
- Monitor lineage, quality scores, and compliance in real time
- Enable member stratification using clean enrollment and claims data
- Analyze provider network performance on trusted data
- Power agentic AI solutions reliably with a strong data foundation

Data transformed. Operations accelerated.

Why Amaze® for Data & AI Outperforms

Healthcare Proven Co-engineered for payer data complexity	Operations Ready Optimized for claims, HEDIS, and PBM workflows	AI-first Foundation Trusted data that fuels agentic AI at scale	Compliance by Design Automated governance reduces regulatory risk	Cloud Native Built for enterprise scale from day one

How it Works

Payer Scenario: Claims Warehouse Modernization

- Auto-discovers legacy claims structures
- Profiles data quality and flags gaps or duplicates
- Applies payer rules to create a unified, standardized view

From Payer Data Modernization to Payer Intelligence

Amaze® for Data & AI doesn't just modernize data; it operationalizes intelligence across payer operations, analytics, and AI. Start your data-to-AI transformation with Hexaware. Contact marketing@hexaware.com

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With offices across the world, we empower enterprises to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
