

Zero License: Replace SaaS with Agentic AI

Reduce SaaS Spend. Simplify Operations.
Execute Faster.

Flyer

Replace SaaS workflows with AI agents in months, not years.

Zero License helps enterprises reduce software costs, eliminate manual effort, and simplify fragmented application stacks by making agentic AI the primary execution layer.

Instead of adding more tools, Zero License introduces an AI operating layer that automates workflows across systems—delivering faster execution with fewer licenses, integrations, and manual processes.

Experience the Power of Agentic Execution

AI Agents That Replace SaaS Workflows

AI agents execute operational workflows directly. From lead routing and ticket triage to invoice matching and onboarding, they fetch and transmit data, trigger actions via APIs, and orchestrate workflows across CRM, ERP, and service platforms.

SaaS Optimization Through Execution

Gain full visibility into SaaS spend, workflows, and manual effort. Zombie licenses, shelfware, and overlapping tools become visible, enabling teams to eliminate low-value software and reduce license costs.

AI-Orchestrated End-to-End Workflows

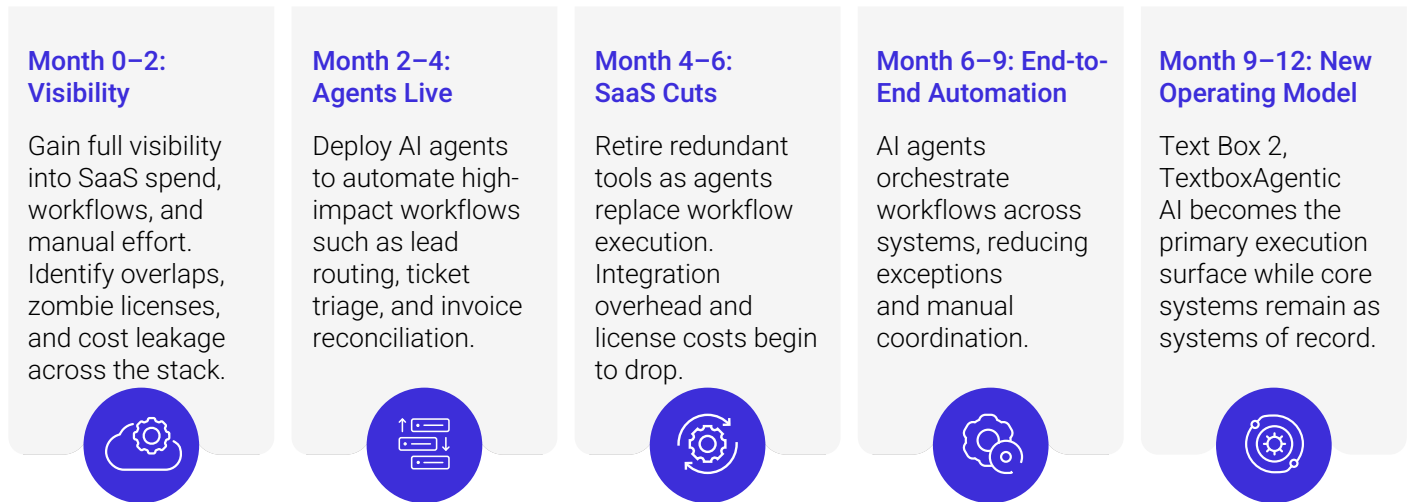

Agents automate intake, routing, execution, and follow-ups across systems while applying intelligence for classification, prioritization, and decision support. Ticket chains and manual handoffs disappear as teams focus on supervising outcomes.

Intelligence Layer Over Existing Systems

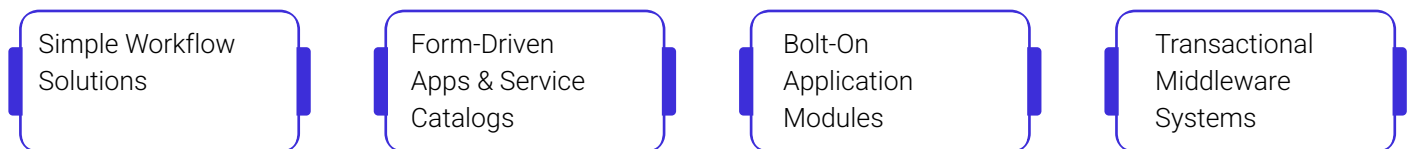

AI agents operate above core platforms, combining workflow execution with an intelligence layer that enables reasoning tasks such as classification, decision support, exception handling, predictive routing, etc.

The Zero License Enterprise Execution Model

Zero License: Ideal Platforms

Zero License Across Industries

Healthcare

AI agents automate claims, prior authorization, and member workflows while core systems remain the system of record.

Insurance

Agents manage intake, adjudication, and follow-ups across policy and claims systems.

Banking and Financial Services

Automate KYC, onboarding, reconciliations, and compliance workflows across banking platforms.

Manufacturing

Coordinate production planning, quality checks, and supplier workflows across ERP and MES systems.

Utilities

Execute service requests, schedule field work, and manage account updates without manual routing.

Experience the Difference with Zero License

Cut software costs | Reduce manual work | Simplify fragmented stacks | Accelerate execution

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With offices across the world, we empower enterprises to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
