

HEXAWARE

TIBCO Business Works to Java Spring Boot Modernization

Make your apps faster, simpler, and
ready to scale

Flyer

Why shift from TIBCO to Java Spring Boot?

With TIBCO BusinessWorks, you've been operating in an environment where legacy middleware slows momentum—driving up costs, increasing downtime risk, and stretching release cycles when speed is non-negotiable.

- Enterprises are achieving up to 50% faster time-to-market with microservices like Java Spring Boot, improving resilience.
- Cloud-native architecture reduces infrastructure overhead while enabling scalable, modern tooling.
- Transitioning to open source eliminates TIBCO licensing costs, reduces vendor dependency, and drives up to 50% TCO reduction.

This is where things change for you. You're no longer reacting to limitations—you're setting the pace.

Why is Java Spring Boot a Popular Choice?

A more flexible, future-ready foundation

Open-Source Environment	Microservices Architecture	AI/ML Integration Flexibility
No Vendor Lock In	Low Total Cost Ownership (TCO)	Higher Extensibility

How Hexaware Delivers TIBCO Modernization

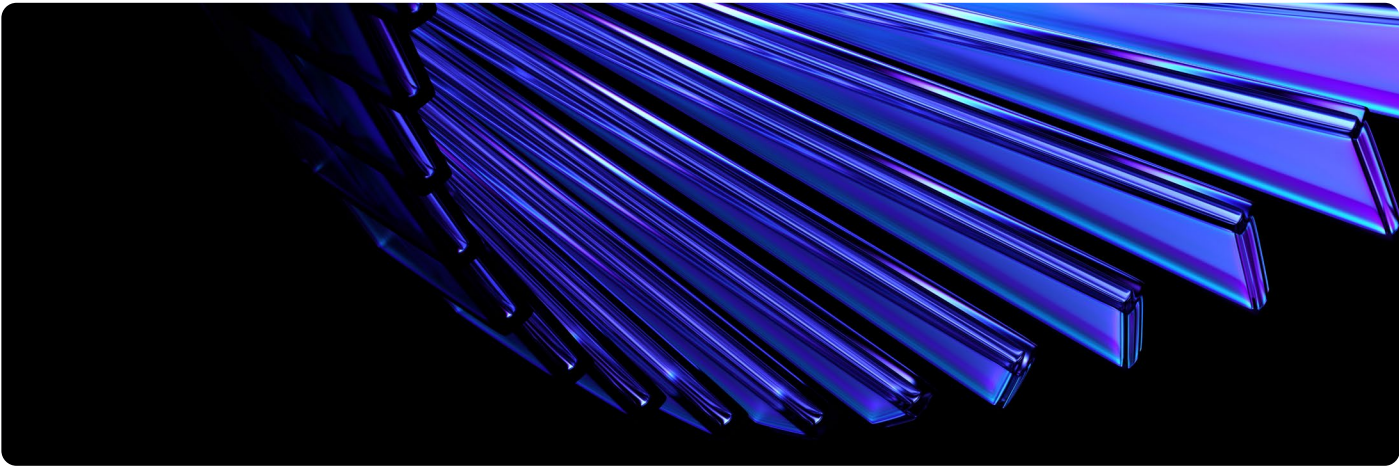

Our proven framework for efficient modernization delivery

Discovery & Assessment	Gain a clear modernization blueprint—aligned current-to-future state architecture, optimized process flows, and a well-defined SOW grounded in business outcomes.
Intake Mapping	See your processes translated into a microservices-ready design, with a validated future-state architecture and refined scope that sets up execution clarity.
AI-powered Code Transformation	Experience accelerated transformation with AI-powered Amaze®—automating code conversion, minimizing manual effort, and driving consistency at scale.
Validation & Rollout	Move into production with confidence—supported by structured knowledge transfer, issue resolution frameworks, and deployment readiness.
Hypercare	Stay supported post-launch with hypercare—ensuring rapid issue resolution, system stability, and sustained performance as adoption scales.

Futureproof with Hexaware’s Cloud Modernization

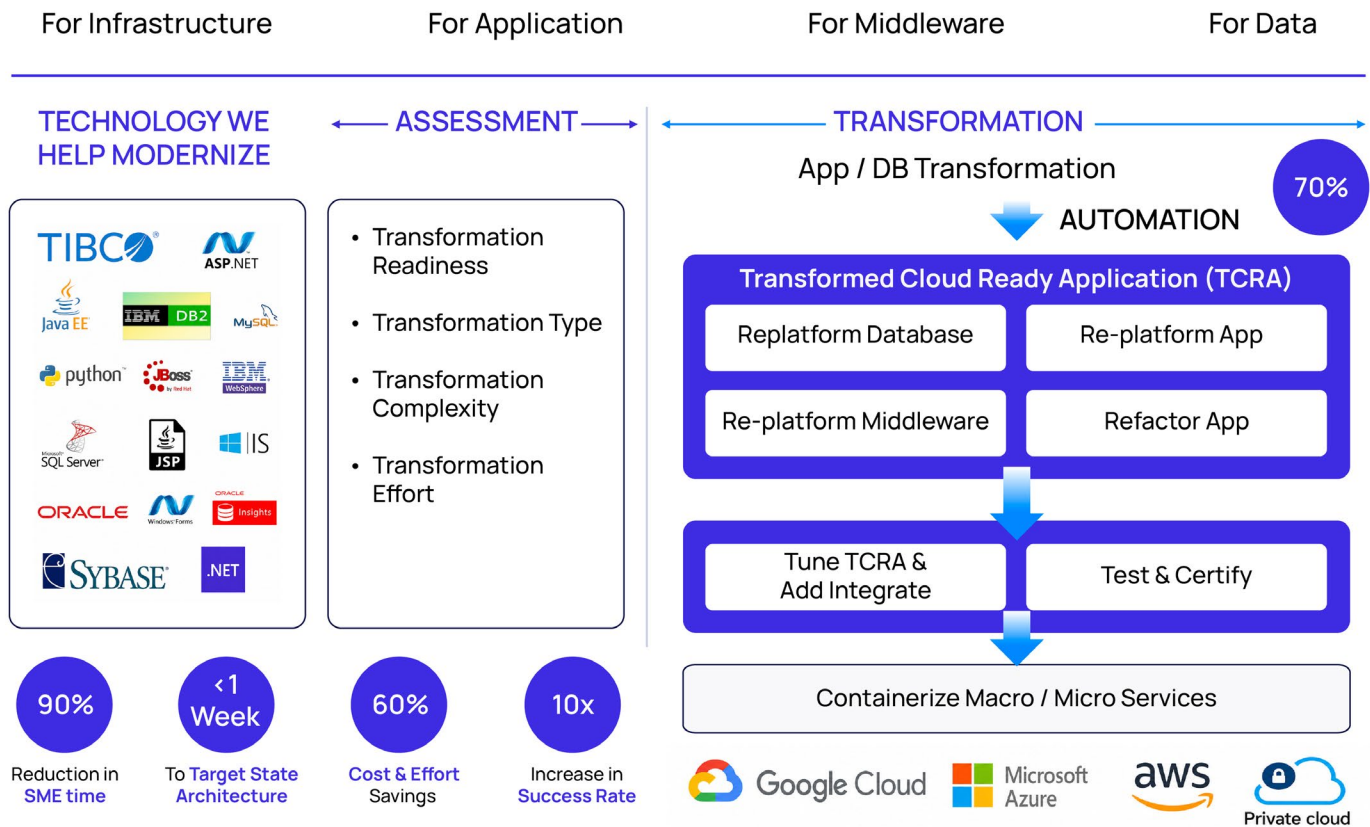

Build resilient, cloud-native systems that scale with your business and accelerate innovation at every stage.

Business Continuity & Reliability	Scalable Architecture for Growth	App Development Lifecycles	Comprehensive Business Outcomes
Boost system uptime by up to 40% with containerized microservices, minimizing downtime and revenue impact.	Adapt to evolving business needs with flexible, resilient architectures—without disruptive re-engineering.	Accelerate development with standardized modern stacks and reusable frameworks, reducing effort by up to 30%.	Businesses see: • 50% reduction in TCO • 40% improved system availability • 50% faster feature releases

Amaze® for Cloud

Accelerate Modernization-led Migration with AI Automation

Why Hexaware?

Your end-to-end cloud transformation partner

Upto 70% automation with Amaze® for Cloud Our US-patented Amaze® IP enables AI-powered transformations that also improve efficiency by 60% along with substantial cost savings.	Hybrid Skillsets across Middleware & Microservices End-to-end expertise across TIBCO and Java Spring Boot, enabling smooth modernization and transformation.	Proven Case Studies Across Industries Deep experience across regulated and non-regulated sectors for compliance, security, and innovation.	~1000 TIBCO and 1100+ Certified Cloud Consultants Hands-on expertise to design, implement, and support robust integration and automation solutions.	Dedicated Centers of Excellence for Hyperscalers Specialized CoEs for maximized value from Microsoft, AWS, Google Cloud, Snowflake, Oracle and more	500+ Transformations with 1400+ Microservices Delivered Proven scalability, flexibility, and faster time-to-market through trusted modernization at scale.

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With offices across the world, we empower enterprises to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
