Data for AI Services for Technology and Gaming Enterprises

From data chaos to AI-ready intelligence

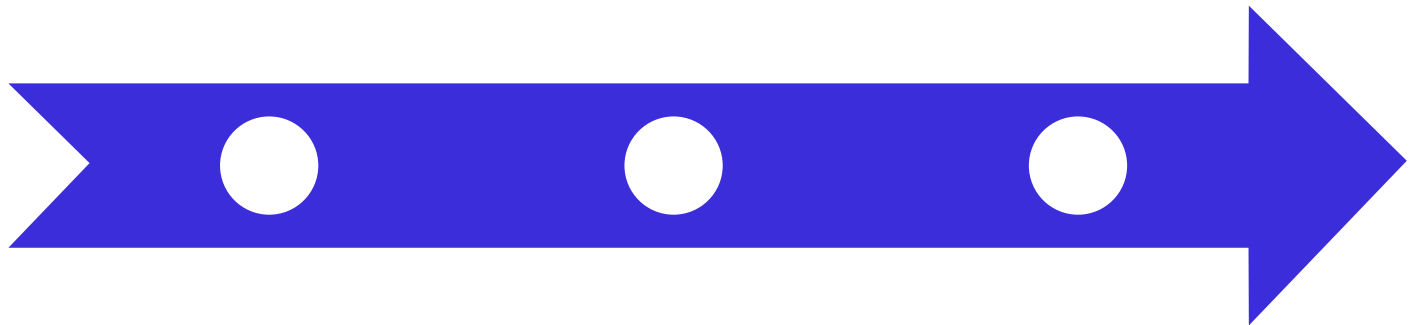

Enterprises today are sitting on vast amounts of data, but without the right enterprise AI data infrastructure, that data remains dormant. Hexaware's data for AI services help organizations modernize fragmented data landscapes into a scalable, governed, and AI-ready data platform that powers Generative AI, LLMs, and agentic automation.

The Problem

Legacy data architectures and siloed systems prevent enterprises from achieving true AI data readiness. Poor data quality, lack of governance, and slow pipelines limit the effectiveness of AI initiatives.

Strategic Opportunity

An AI-ready data platform enables faster decision-making, improved operational efficiency, and continuous innovation across the enterprise.

Market Reality

Competitive differentiation now depends on how quickly raw data can be transformed into trusted intelligence. Organizations investing in data modernization for AI are moving faster from insight to action.

Hexaware transforms static data repositories into high-velocity intelligence engines. Our AI data infrastructure services enable enterprises to confidently deploy Generative AI, LLMs, and autonomous workflows—securely, responsibly, and at enterprise scale.

Hexaware's data for AI services modernizes legacy data estates into structured, governed, and AI-optimized ecosystems. By establishing a strong enterprise AI data infrastructure, we ensure that your AI initiatives are scalable, reliable, and cost-efficient from Day One.

Key Capabilities

AI Data Readiness Assessment: A comprehensive AI data readiness assessment that evaluates architecture, data quality, governance maturity, and operational readiness—delivered with precision scoring and a clear modernization roadmap.

AI Data Governance Framework: An enterprise-grade AI data governance framework ensuring compliance, lineage, security, and trust across structured and unstructured data used by AI and LLMs.

Semantic Data Layer Development: Creation of a unified semantic layer and business ontologies that enable consistent, explainable, and reusable AI decision-making across the enterprise.

Real-Time Context Fabric: A real-time data fabric that integrates live operational data streams, enabling contextual, responsive AI experiences and autonomous workflows.

Agentic Data Ops: AI agents automate ingestion, transformation, monitoring, and optimization of pipelines—reducing operational overhead and accelerating insights.

Data Quality for LLMs: Proactive data quality for LLMs using predictive checks, observability meshes, and trust layers to reduce hallucinations and ensure accurate AI outcomes.

Business Impact

- 70% reduction in manual effort using autonomous data pipelines
- 10x faster customer onboarding via real-time AI intelligence
- 80% reduction in licensing costs by eliminating traditional ETL tools

Why Hexaware?

- **Proven Expertise:** Decades of leadership in data transformation, data modernization for AI, and AI enablement
- **Outcome-Driven Delivery:** Measurable improvements from Day 1, tied directly to business KPIs
- **Innovative Platforms:** Proprietary automation through Tensai® and RapidX™
- **Trusted Partner:** Transparent, human-centric, and business-first data for AI consulting

Ready to transform your data estate into an AI-ready foundation?

Hexaware's data for AI services helps you move from fragmented data to trusted, scalable AI intelligence.

Contact us today at marketing@hexaware.com to schedule your AI data readiness assessment and begin your journey to enterprise-grade AI success.

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With offices across the world, we empower enterprises to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
