

HEXAWARE

Modernize for Sovereign AI with Oracle

Build your high-performance
AI cloud platform

Flyer

Build Oracle Cloud Infrastructure (OCI) for High-Performance Workloads

Accelerate global enterprise AI-readiness with Oracle Cloud Infrastructure (OCI), the second-generation cloud platform to overcome the limitations of traditional cloud environments with advanced security, scalable infrastructure, and predictable pricing.

Why Build with Hexaware

Sovereign AI-Readiness

Global AI-readiness, bare metal computing, and database optimization.

High-performance

Consistent scalability and resilience for mission-critical operations.

Cost-efficiency

Simple global pricing with up to 50% lower costs than other hyperscalers.

With Hexaware, get Oracle Cloud Infrastructure (OCI) for enterprise-grade workloads with bare metal services for AI-intensive operations and Autonomous Database technology to reduce operational risks.

Oracle's New Cloud Features for Enterprise AI

A truly distributed cloud for flexibility and performance

Oracle Alloy

Plan, design, and build customized AI services with Hexaware for OCI services on the Oracle platform.

Dedicated Region

Secure the full OCI public cloud stack within client data centers for high-security environments.

Sovereign AI Cloud

Ensure data residency and operational sovereignty, with EU-only personnel supporting the infrastructure.

Multicloud Integration

Enable, integrate, and optimize multicloud environments including AWS, Azure and Google Cloud databases.

Accelerate Oracle Cloud Adoption with Hexaware

A simplified cloud journey with our cloud transformation office

Strategy & Advisory

Cloud Economics

Get high-performance OCI infrastructure at significantly lower total cost of ownership (TCO) compared to competitors.

AI Compute Readiness

Assess, prepare, and optimize existing data center infrastructure for advanced NVIDIA GPU clusters.

Multi-Cloud Strategy

Design, integrate, and optimize seamless Azure, AWS, and Google Cloud connectivity using OCI interconnectivity features.

Foundation

AI Platform and Security

Set up, secure, and manage OCI Landing Zones and IAM for zero-trust architecture.

Business Continuity and Disaster Recovery

Establish resilient disaster recovery and high-availability setups for databases.

Migration

Database & Storage Migration

Utilize, migrate, and manage complex Oracle databases and Exadata on OCI with minimal downtime.

Cloud to Cloud

Execute, migrate, and optimize existing workloads from other hyperscalers to OCI for high performance.

Modernization

Database Modernization

Upgrade, modernize, and optimize legacy systems with Autonomous Database.

Modernization for Enterprise AI

Transform existing apps by embedding AI capabilities with OCI services.

Platform Engineering

Platform Assessment for AI

Evaluate apps for AI readiness and optimize for GPU-accelerated computing.

Automation/IaC

Create Infrastructure as Code (IaC) to streamline deployment.

Managed Services

Cognitive Cloud Ops

Evaluate apps for AI readiness and optimize for GPU-accelerated computing.

Cloud FinOps

Ensure cost management in complex, hybrid environments.

Assure Secure Sovereign AI with Hexaware

Build trusted sovereign AI environments with Hexaware on Oracle for secure data residency and enterprise-scale governance. See how Hexaware helps accelerate secure Oracle cloud infrastructure (OCI) adoption. Reach out to marketing@hexaware.com to learn more.

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With offices across the world, we empower enterprises worldwide to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
