

Merge Acquisitions Without a Big-Bang Migration

Your acquisition strategy is working. Your data landscape can't keep up. Replace multi-year consolidation programs with a modern data foundation built for cross-sell readiness, governance, and 10x growth — no rewrite required.

Private equity firms create value across their portfolio companies. That value depends on how quickly newly acquired businesses can be integrated, analyzed, and scaled. When data stays fragmented, opportunity stays hidden.

The Challenge

Growth through acquisition creates opportunity. It also creates complexity. Every deal adds new systems, data sources, reporting structures, and compliance requirements. As portfolios expand, a unified view of the business gets harder to build, cross-sell opportunities go unseen, and analytics can't scale across acquired entities. The result: slower decisions, fragmented reporting, delayed value realization, and rising operational costs.

Six Questions Every Data Leader Is Being Asked

Cross-sell Readiness	How do we identify opportunities across acquired businesses before consolidation is complete?
Acquisition Onboarding	How do we integrate new firms in days, not months?
Federated Governance	How can sub-domains manage data while staying compliant with the enterprise governance?
AI Readiness	How do we move from dashboards to AI-driven decision-making?
Audit Readiness	How do we automate governance, lineage, and compliance reporting?
Scalability	How to build a scalable solution data expansion due to multiple market presence?

A Modern Data Foundation Built for Private Equity

You don't have to choose between moving fast and getting it right. Instead of forcing a costly, multi-year consolidation program, Hexaware builds a virtualized data ecosystem that connects information across your acquired businesses — while maintaining governance, scalability, and compliance from day one.

How we deliver Modern Data Foundations – Proven across Global Firms

Modernize AI-ready data foundations using Zero-Copy architectures, Data Products and metadata-driven governance—successfully delivered for Big Four firms.

Accelerate enterprise data onboarding through reusable, metadata-driven ingestion frameworks—reducing ingestion timelines by 50% for a global advisory firm.

Embed governance by design with semantic layers and enterprise data models—implemented for large-scale professional services organizations.

Drive trusted AI and analytics through enterprise ontologies and semantic modelling—proven across Big Four data transformation initiatives.

Build scalable data platforms that absorb rapid M&A-driven growth while maintaining governance and performance—supporting 5x data expansion.

The Outcome

Because your data is connected from the start — not after a years-long migration — you get day-one cross-sell readiness across every acquired practice, plus a foundation ready for analytics, AI, and long-term growth.

Built for Growth. Designed for Scale. — 10x Growth. No Rewrite.

Powered by Snowflake, Databricks, Azure Data Lake, and AI-driven governance frameworks, our approach helps you:

- Accelerate data integration across acquisitions
- Improve portfolio-wide visibility
- Enable AI-ready analytics
- Simplify compliance and governance
- Reduce operational complexity
- Drive long-term cost optimization

Why Hexaware

- 2,000+ Azure-certified professionals
- 400+ Snowflake/Databricks-certified specialists
- Proven credential in building modern data platform
- Deep expertise in cloud-native data platforms
- Proven across large accounting and advisory organizations

Ready to turn acquisition data into portfolio value? Let's build a modern data foundation for your portfolio. Talk to our team: marketing@hexaware.com

About Hexaware

Hexaware is a global technology and business process services company. Every day, Hexawarians wake up with a singular purpose: to create smiles through great people and technology. With this purpose gaining momentum, we are well on our way to realizing our vision of being the most loved digital transformation partner in the world. We also seek to protect the planet and build a better tomorrow for our customers, employees, partners, investors, and the communities in which we operate.

With offices across the world, we empower enterprises to realize digital transformation at scale and speed by partnering with them to build, transform, run, and optimize their technology and business processes.
