

Evolve Enterprise AI with Microsoft IQ

Build a unified intelligence layer for data, AI, and insights

Flyer

In today's world, scaling AI across core operations is key to becoming a Frontier Firm—Microsoft's vision for enterprises that reimagine work through intelligence-on-demand, human-agent teams, and AI-powered operations.

In this journey, Hexaware helps you unify fragmented data, workflows, and institutional knowledge with Microsoft IQ—grounding AI in trusted business context so you can make faster, more confident decisions.

What's Needed for a Unified Intelligence Layer

Turn enterprise data into trusted AI intelligence

AI is only as powerful as the context behind it. With Microsoft IQ we help you connect data, knowledge, and workflows to build grounded, trusted intelligence—so you move from AI experimentation to true agency.

Contextual & Trusted Intelligence

Get grounded answers backed by full enterprise semantic reasoning—with no SQL, hallucinated metrics, and complete auditability.

Improved Productivity

Integrate AI into your daily routines to surface briefs, automate status reports, and help you make proactive decisions faster.

Zero Knowledge Silos

Cross-reference SharePoint policies, lakehouses, vendor contracts, and PDFs instantly—with source citations for every insight.

How Hexaware Powers Your AI Frontier Firm

Build the foundation to put AI to work — faster, smarter, and at scale

AI Frontier Framework

Why You Need it

Make Data AI-ready with Microsoft Fabric

Create governed, contextual, coherent, and trusted data with Microsoft Fabric that agents, copilots, and analytics can act on with confidence.

Workflow Automation using Work IQ

Synthesize daily operational context with Microsoft Fabric including teams, emails, and schedules to generate prioritized project health reports.

Enterprise Knowledge with Foundry IQ

Unify enterprise knowledge across documentation and structured storage to deliver grounded, source-cited policy and compliance answers.

How it works	Ontology Semantic Layer and Knowledge Graph A unified semantic intelligence layer for real-time insights.	Hexaware's WORK IQ Expertise Embedded, context-aware AI copilots into daily workflows.	Unified Enterprise Knowledge Cross-repository search and deliver contextual answers.
What you get	Conversational Analytics: Ask business questions directly without SQL or dashboards. Ontology Reasoning: Intelligent mapping of relationships across structured and unstructured data for actionable insights.	Morning Briefs: AI summarizes priority tasks, key metrics, and operational updates upon login. Automated Reporting: Health reports for projects, end-of-day updates, and real-time status reports.	Cross-repository Search: Seamless search for policies, SOPs, contracts, and reports across SharePoint, Lakehouses, and PDFs. Grounded Responses: Provides compliance answers with exact citations, ensuring governance and trust.
Challenges solved	Context Fragmentation & Analytics Delays: Eliminates data and context silos, reducing analytics backlogs and querying speed.	Loss of Operational Focus: Prevents context switching across emails, chats, and disparate reporting portals.	Compliance Risks & Hallucinations: Ensures strict alignment with enterprise governance and policies with verbatim citations.

Proven Business Outcomes

3X Faster Decisions Real-time conversational analytics reduce time-to-insight to seconds.	40% Increased Productivity Automation of routine tasks frees up time for high-value activities.	100% Compliance and Trust Grounded AI eliminates hallucinations and ensures auditability.
